Brentwood® Deck Modification	5067 Brentwood® 3260 WP 5567 Brentwood® 3260 BA 5069 Brentwood® 3660 WP 5569 Brentwood® 3660 BA 5073 Brentwood® 3666 WP 5073 Brentwood® 3666 BA 5074 Brentwood® 3672 WP 5574 Brentwood® 3672 BA 5075 Brentwood® 4272 WP 5575 Brentwood® 4272 BA	Decks of each model will be changed to be able to install a LH, RH or special nailing flange. This will make the product easy to be installed in a tub/shower application and creates a water-tight installation. The field installed nailing flange kit will also be available for these models. SWP150L - LH factory installed nailing flange SWP150R - RH factory installed nailing flange SWP150S - Special factory installed nailing flange (diagram required) SWAP00 - Nailing flange kit (field installed)	
Low Profile Adjustable Back Jets	Swirl-way® Whirlpools with Hydro-v back Jet System	The back jets in Swirl-way® Whirlpools are being upgraded to a low profile, fully adjustable jet. The flow of water coming from the jet can be increased and decreased by turning the jet face clockwise and counter-clockwise. This gives each bather total control of the intensity of the back massage.	
Chromatherapy Mood Light System	Swirl-way® Whirlpools Ariance™ Air Massage Baths	New and improved Chromatherapy mood light system transforms the entire bath with a wide spectrum of high-intensity colors. The system features brighter, wide-angle lights that provides outstanding luminosity across a spectrum of RGB colors. The light housings are small in diameter and are mounted nearly flush to the tub wall for a clean, minimalistic look.	
Swirl-way® Basic Keypad	Swirl-way® Basic Package Whirlpools	Newly designed round keypad for Swirl-way® Basic Package whirlpools. The keypad has a more tactile feel to make it easier to turn the whirlpool bathtub off and on. It is simple and easy to operate.	
Constant Heat	Swirl-way® Bathtubs	Re-launch of the Constant Heat option for Swirl-way® Bathtubs. Option includes a low flow, high efficiency pump to calmly move the water past an inline heater to maintain the warm water temperature for a long soak.
